

# Fairy Door & Garden

Welcome the craft fairy in to your house with their very own door and garden!

**Included In This Kit:** Lollipop sticks, paints, card, flowers, embellishments, glue, basket  
**You will need:** Scissors

## Instructions

1. Layout your 6 lollipop sticks side by side and cut a piece of paper to match the width and height. Put glue all over your piece of paper and glue onto the lollipop sticks, making sure they are lined up evenly.
2. Paint your lollipop sticks in the colour you would like the door. Leave to one side to dry.
3. **Door Frame:** Cut an A4 sheet of coloured card in half (A5). Draw a pointed arch on the sheet by marking the middle of the short side of the paper (just a dot will do) and making this the point of an arch. Cut out. Inside the arch we will cut out an arched doorway. Measure a few centimetre in from the Take a piece of the coloured card and cut a rectangle slightly higher and wider than your lollipop sticks. Fold it gently in half and draw half an arch. Cut this out. We are going to cut the inside of the door now. Cut a doorway out of this following the line of the arch.
4. Once your lollipop sticks are dry use PVA to glue the frame to the sticks. Leave to dry.
5. With your green piece of card we are going to make the grass in two different heights. Fold over your green card lengthwise with the front lower then the back
6. Place your door in the centre of the grass but don't glue yet. We are going to make a small mark either side and then cut the green card to either side leaving the centre uncut.
7. Open out the green card and carefully cut in strips to the fold line. Do this on both side for the long and the short grass leaving the section in the centre for the door to stick on to.
8. Glue down some flowers, gems and don't forget to hide some in the grass!
9. Glue down your door in the centre of the grass and leave to dry.
10. Decorate your door with a sign, gems for a door knob, and the hinges, using the leftover piece of card you cut from the door frame. This is your very own craft fairy door so decorate how you like!

## Garden Basket

1. Paint your basket and leave to dry
2. Once dry, loosely scrunch up some crepe paper and put this in your basket as a base.
3. You can add some small flowers, gems or small balls of crepe paper as apples!. Glue these to the top or leave loose.
4. Draw flowers or vines on the outside of the basket to finish.
